

# Burro I Class

## News for January, 2012

### Class Pictures

*Our school year is going by so quickly. The children have really grown socially, emotionally and physically. It has been such a pleasure being part of the process. We hope you all had an enjoyable holiday break and got to spend some quality time with those you love.*

### Nature News

### Sign Language and Music

#### Learning About Each Other

Last month the children enjoyed learning about each other's families and the traditions you all hold dear to your heart. The children could not have been more excited to share their "All About Me" books with one another.

We will have the books on display for a few more weeks before returning them back to you. Thank you for sharing the wonderful photos and facts about your child.

#### Our upcoming units and themes will be:

Frozen vs. Solid Liquids

Wetlands

Oceans

St. Paul Winter Carnival

Again we ask that if anyone has an interest in coming into our class to share a project, talent, book, etc... please let us know. We hope to spend a lot of time outdoors in the snow so please send appropriate clothing for your child. (Extra socks and mittens are always a great idea!)

Also, we apologize for the limited number of photos this month. Our camera broke during the first week of the month and slowed us down a little.

Thank you,

*Kelly and Denise*

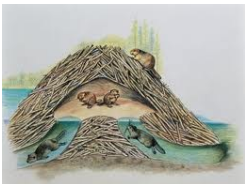

### Animal Homes: Mounds, Nests, Webs , and Lodges

This month we have been very busy learning about animal homes and constructing them around Children's Country Day. We started out learning about termites and the homes they construct out of sand, dirt, saliva, and wood. Pre-2 students helped paper mache a life size termite mound as well as make clay termites. We also went outside and constructed a termite mound out of snow. From termites we switched to another animal architect, birds. Students learned about a variety of different birds and the nests they make. Oven birds construct their nests out of mud, while weaver birds create hanging nests that look like baskets. Pre-2 students created their own nests and hung them from a tree in the nature room. Pre-1 students and toddlers also attempted to build nests out of sticks.

Spiders were our next topic. Pre-2 students learned that some spiders make webs, while others actually dig their home. We talked about the different aspects of the trapdoor spider homes and students created pictures of their favorite spider homes in their nature notebooks. We went outside to the woods and students built webs from yarn. For our final nature classes,

we learned about Beavers. Students learned about the different steps that beavers use to build their lodges. We went out to the woods to create our own beaver lodge. Pre-1 students enthusiastically helped build up the lodge. Toddlers had the chance to create their own little beaver lodges out of wood and rocks.

### Coming in January:

If you are looking for some opportunities to explore nature with your family, here are some local options:

- The Minnesota Science Museum has an amazing exhibit on extreme weather. I highly recommend it!

- In February, the Wildlife Rehabilitation Center will be hosting their annual open house.

The staff will share how they care and rehabilitate Minnesota's wild animals. Check out their website for more information.

In January we will be learning about water. Students will explore the different characteristics of water, learn about Minnesota's water habitats, and spend some time learning about the ocean.

*-Emily*

## Sign Language and Music

**In Sign Language** we're learning to sign the alphabet and how to finger spell our names. Signing the letters is a wonderful visual that helps children in learning their letters and another way to practice the spelling of their name. The Preschool 1 classes have been signing the first letter only of their name. The Burro, Ponies and Llamas practice their full name. We've also learned to sign the phrase, "My name is \_\_\_\_\_" and "What's your name?" We ended the month playing a fun Sign Language Bingo Alphabet game.

**In Music** we've had fun with creative movement as we sing the winter songs we've learned. The children especially enjoy dancing with scarves as we sing "One Little Snowflake" or pretending they're a bear as we sing about the hibernating bears in the winter. We've also been singing and signing the "Alphabet Song" and "What is Your Name?" to reinforce what we're learning in Sign Language. Another favorite song has been, "Three Little Fishies". Everyone enjoys acting this out and swimming with the rainbow colored ribbons. There's also a rhythmic clapping part they love to do on the chorus. Your child might enjoy listening to it at this website. [http://www.youtube.com/watch?v=iK\\_wrM8OdGY&feature=fvw](http://www.youtube.com/watch?v=iK_wrM8OdGY&feature=fvw)
